Template Website Design

Looking for a professional website at an affordable price? We offer pre-designed templates that can be customized to fit your brand and business needs*.

*Template websites are pre-designed to look good! This means that you can get an inexpensive website that is proven to look good at a great price. See some of the great examples of websites built from templates here **https://cyanwebsites.com/**
While templates are a great place to start and by far the fastest and most cost effective way to get your business online they might not fulfill the exact vision you have for your business. If the vision you have for your business can not be captured in a template, we offer full website design services to make sure every detail is exactly as you desire. We also offer co-creation website design services where you can give us an example and we can create a website that fits the example style and motif.

Items included in a **Template Website Design**:

1) **Your Images**: We incorporate your images into the template design. Even the best image might not be perfect for a website and we get that so included in the template website design you can change any image once for free.
2) **Your Text**: We incorporate your text as headers, text blocks, and descriptions. To make this process easy, we provide a form that you fill out and then apply the text to the template web design. Once the text is applied to the website we do one design review in which you can change any of the text content once.
3) **Your Logo**: We incorporate your logo into the template web design. After your logo is applied to the website we do one design review in which you can change the size and location of your logo once.
4) **Website Design Review**: After we have applied your logo, images and text to the template design we present you with the rough draft of your website. At this point you can change the images, text and logo to your website to make it perfect**.

**Changes can be made for free up to the specified limit for the Template Website Design package. Changes above and beyond what is included in the Template Website Design Package are billed at $25 per change.

Items **not** included in **Template Website Design**:

1) **Website Element Positions**, including text, photos and videos. Our templates are made to look as good as possible with modern design and current layout trends. If your website vision can not be contained in a generic template, we can make your dreams come true with our **Custom Website Design** package that lets you manipulate every element to perfection.

2) **Font changes**, including size and styles : The website templates are designed to attract the customers attention and look good while doing it. Even with impactful stock fonts you might require something different and this is no problem. Our web design team can make sure your fonts are tuned to perfection with a **Custom Website Design** package.

3) **Creating and/or finding custom graphics,** Including company logos and stock photos: If you have a logo and pictures of your business you don't need to worry about this. We use your images on the template website, it's all included and it looks great, see some examples here **https://cyanwebsites.com/**
If you don't have a logo, our graphics design team can make an awesome one for you, see these examples **https://cyanwebsites.com/**
If your business is just getting started and you need us to create some stock photos you are in luck. Cyan Websites helps small business build business with awesome website images with our custom website design packages, see some examples here **https://cyanwebsites.com/**

What happens if I start with a template but realize I need to tweak something to make it perfect. Don't worry, this is how many of our websites are made. We start with a temple and update the element you need to make the website perfect for you. If you start with a template, any changes beyond what is included in the template are made for $25 per change. This makes it easy to get a great start on a website design with a template and tweak it to perfection for a minimal cost.
